"EUROPE DAY"

Since 1964, the peace and unity in Europe are celebrated the 9th of May. This date marks the anniversary of the historic Schuman Declaration. At a speech given in Paris, the French foreign Minister presented his vision of a new type of political cooperation in Europe, which would have made any war between European nations unthinkable in the future. To celebrate "Europe Day", the EU Institutions open their doors to the public in early May in Brussels and Strasbourg. Each year, thousands of people take part in organized tours, debates, concerts, and other events intended to achieve a closer connection between the EU and its citizens.
