Facoltà/Faculty	Engineering and Architecture/ Ingegneria e Architettura
Dipartimento/Department	Civil - Environmental Engineering and Architecture
UniCa reference person	Caterina Giannattasio-Donatella Rita Fiorino
Course name	Laboratorio integrato di progettazione architettonica e restauro - Modulo restauro/Integrated laboratory of architectural design and restoration - restoration module
SSD	ICAR/19 RESTAURO
Semester	Spring, 2nd
CFU	2
n. of VPS teaching hours	20
Language of instruction	English
Course Content and VPS' profile	<p>The course integrates the disciplines of Architectural Design and Restoration and aims at the knowledge and experience of the main design paradigms that operate in confrontation with pre-existing architectures, experimenting with 'modification' as a critical action, aware of and attentive to the values of the landscapes to which artefacts and architectural and urban complexes belong.</p> <p>The theoretical contents of the 'Modulo Restauro- Restoration Module' deal with specific themes related to the relationship between 'Old and New' (architecture and landscapes) and to the project as a dialogic practice as well as to the temporal projection of contemporary Architecture in historical contexts. The laboratory activity, therefore, is aimed at the design experimentation on the pre-existences at the territorial, urban and architectural scales. Further to the educational framework, research activities to develop together specifically focus on archaeological and military assets, in coherence with the ongoing research programmes.</p> <p>The figure of the visiting professor must be identified among Associate professors with a high scientific profile who have, in their career, integrated internationally teaching and dissemination activities (seminars and conferences) also through co-creation activities/methodologies and conservation practices considering both tangible and intangible heritage, related to the guidelines of the course and to the research fields.</p> <p>The choice of scientific value must be attested by activities and recognitions at international level.</p>
Academic position of the VPS'	Professor
